

XDOC for the **Collection Industry**

- ✕ **Native Web Based Design**
- ✕ **Powerful Electronic Document Management System.**
- ✕ **Fast Implementation. Engineered for easy Integration.**

XDOC: Advanced Technology to make EDM simply effective!

Why XDOC?

You are a collection company or a collection software provider looking to integrate the most efficient Electronic Document Management (EDM) system available into your collection processing application.

With XDOC You Get

- 100% native web-based architecture which makes implementation faster, configuration easier, using the application more intuitive and supports smoother collaboration models with your partners
- An EDM solution without the complexity of legacy systems. It's cheaper to implement, cheaper to operate, easier to buy
- Advanced EDM features for document capture and management, security, compliance support, scalability and business continuity assurance
- Simple integration to give your application the power of electronic documents throughout the collection process, anytime from anywhere
- Software written natively for the web, with collection industry experience

XDOC Design Philosophy

When we set out to develop this next generation EDM system, we started with many years of collection industry and EDM experience, a clean slate for the technical architecture and clearly defined engineering design criteria.

XDOC's Key Design Specifications

- Purpose-built and powerful Electronic Document Management system for the collection industry
- Uncompromising document security, compliance support and business continuity features
- Future proof technology and performance using standard hardware and proven web architectures for scalability and redundancy
- 100% browser interfaces for all user and administration functions
- Industry leading performance for viewing and working with documents
- Easy and straightforward integration into business process systems

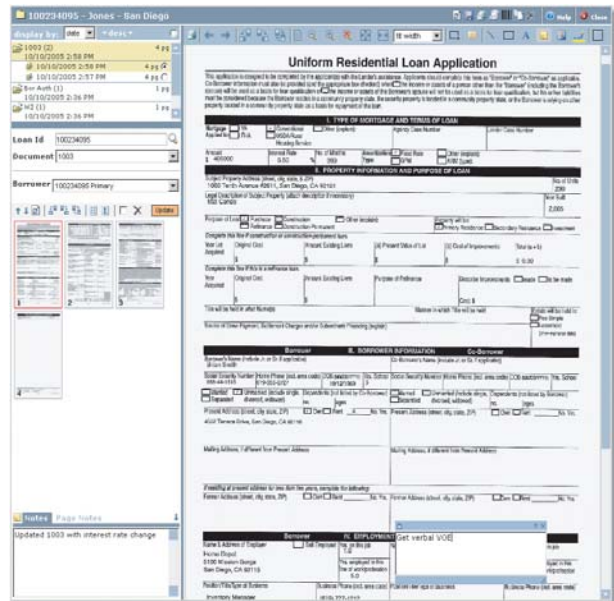

XDOC is built to optimize the process flow of the document intensive collection industry environment. See the power of XDOC and experience the improvement in business productivity achievable with this latest EDM technology!

Features and Functions

XDOC is designed to be a robust, full featured EDM system to support demanding collection management systems.

EDM for the Collection Industry - Advanced integration or stand alone models.

- Automatic capture of documents from any input source including scanners, printers, multi-function copiers (e.g. Xerox DocuCenter), enterprise fax servers, fax to email providers (e.g. eFax), and email gateways
- Intelligent scan client, print client, and web interfaces for indexing, splitting, and assigning documents
- Configurable file structure (virtual case folder) and workflow
- Automatic barcode detection for form identification and data capture
- Definable document types and field indexes
- Document versioning
- Packaging and delivery of documents via email, http, ftp, and specific collection agency formats
- Web access to all documents throughout the collection process via standard browser interfaces
- Full annotation support including highlights, text, and stamps
- Rapid image display with ability to pan, zoom, and scale
- Filters and image adjustment for hard to read documents
- Export of documents in multi-page PDF or TIF formats with advanced PDF features including password protection, bookmarks, and annotations

Integration Features for Collection Management Systems

- API for the collection industry allows easy 3-step integration process
- Integrated login and user authentication through your collection system
- External document container (virtual case folder) API for attaching documents to entities in your applications
- Provides full document management features and functionality to your collection processing application
- Built in system event notifications to collectors or legal team
- Built in hooks for integrating with any OLEDB compliant data source

XDOC Engineering and Business Facts

100% Web Architecture - Collection Process Collaboration and Scalability

- Industry's only fully featured HTML browser image viewer with no ActiveX or Java requirements
- Collaboration with internal groups and external partners, such as other collection agencies, legal firms and insurance companies
- Customizable look and feel via style sheets, themes and user interface controls
- Document conversion of any office document into a web viewable format
- 100% web services to support high transaction volume and best in class scalability

Engineered for Security, Compliance, and Business Continuity

- Supports https, ssl, and all standard internet security protocols
- Supports third party NAS and data storage devices and fault tolerant disk configurations
- Automated archiving of documents with metadata to back up storage devices
- Audit tracking of events and data
- Configurable security and access down to document and page level

Lowest Total Cost of Ownership, Straightforward Pricing

- Advanced architecture, central administration, no client software required
- Capacity scaling with standard IT hardware
- Fast implementation
- Simple server based pricing
- No transaction or usage fees, unlimited users

About Axacore, Inc.

Axacore, Inc. is a privately-held core technology provider of faxing and document imaging solutions. Axacore develops solutions that help organizations streamline paper-intensive business processes and automate the flow of documents to team members, customers, partners, and vendors.

Headquartered in San Diego, California, Axacore is committed to excellence in product development and customer support while maintaining a technological edge. Key products include FaxAgent, ScanAgent, and XDOC.

Founded in 1996, Axacore's award-winning solutions are distributed worldwide through a network of partners, OEM providers, and direct sales delivering solutions to a broad range of industries, organizations, and enterprises of any size.

How to Buy XDOC

Contact Axacore for a demonstration or discussion on how XDOC can solve your electronic document needs.
